

Making Origami Cups

Directions are online at www.squidoo.com/origamicup (video) and www.activityvillage.co.uk/Origami%20Cup.pdf (pictures).

UUSC volunteer Ann Hailey, of Iowa, shares, “I think the point to notice is that the bottom of the cup is not pointed; it is flat. And, an imaginary line across the bottom is parallel to an imaginary line across the top. When feeling silly, I demonstrated this by standing with my arms out to my sides (like a triangle). I folded my right arm and put my right hand on my left shoulder (like the first fold across) and then did the same with my left arm (like the second fold across). Then I bowed my head forward.”

You can use recycled (clean!) paper, or print and use the page below that includes text about the human right to water.

UUSC defends the human right to water

Safe, sufficient, accessible, affordable water for personal and domestic use

Water is a human right
